

## Description

This pen type professional pH meter is ideal for all water quality testing, water purification applications, wastewater regulation, aquaculture (hydro culture), hydroponics, labs & scientific testing, pools & spas, aquariums, ecology testing, water treatment and more.

It is designed to measure pH levels from 0~14 and has the following advance features: automatic calibration (pH4, pH7 & pH10), waterproof, automatic temperature compensation (ATC), dual display (pH & temp.), switchable °C & °F, data hold, low battery indicator, and auto power off with disable feature.

The package contains, the pH meter, four 1,5V (LR44) batteries, three buffer solutions (pH4, pH7 and pH 10) and the operation manual.

## Product Characteristics

- Ideal for water quality testing, measures pH and temperature
- Professional product extensively tested in Europe
- Automatic Calibration by just a single push of a button
- pH & Temperature display with switchable °C & °F
- Waterproof housing meets IP65 rating
- Comes with the Standard Buffer Solutions pH4.0, pH7.0 & pH10.0

## Technical Specifications

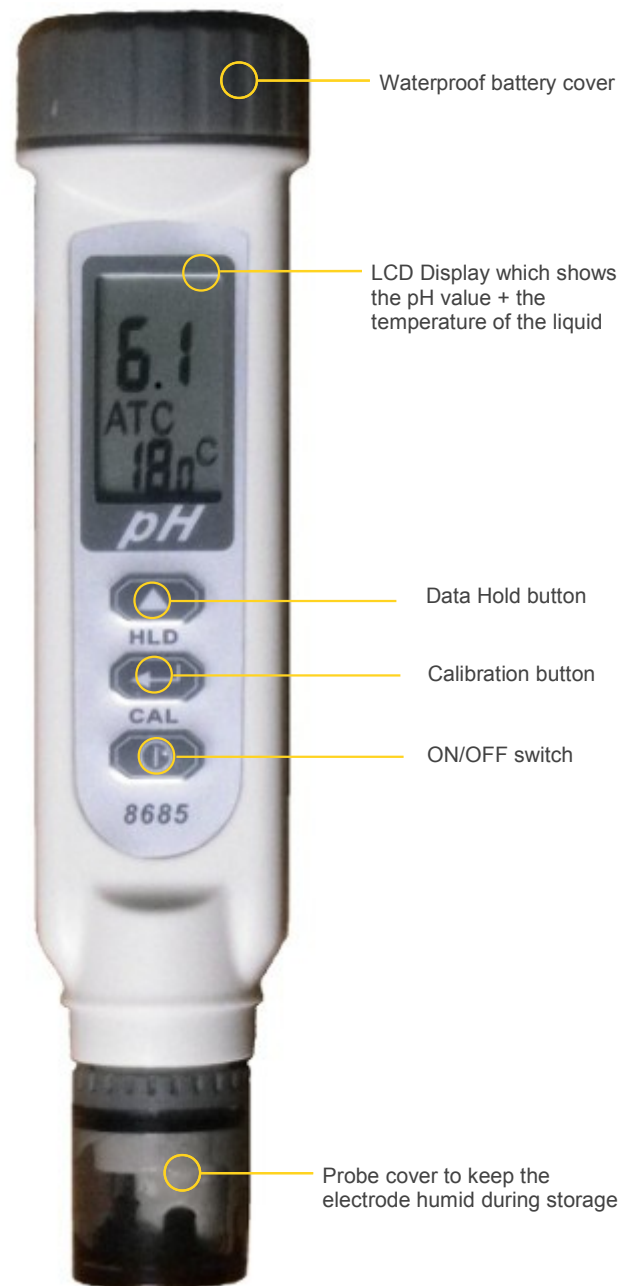

Power	• 4 batteries LR44 included
Product size	• 165mm (l) x 35mm (w) x 32mm (d)
Product weight	• 74 grams (incl. batteries)
Measuring range	• pH: 0~14pH
Accuracy	• ±0.2pH
Resolution	• 0.1pH
Dual display	• temp. °C/°F & pH with ATC
Calibration Point	• pH4, pH7 & pH10
Certification	• RoHS and CE approved

## Ordering information

Packaging type	• 1 per carton
Carton size	• 19cm(l) x 8cm(w) x 5cm(h)
Carton weight	• 138 g
HS-Code / Taric-Code	• 9027801100
