

## Description

The Thirsty Light is a moisture meter for potted plants (houseplants, terrace plants or other container plants) and warns you when to water them. When the soil gets dry the Thirsty Light alerts you with a flashing LED light. As long as the soil stays humid it blends in perfectly with its green color.

With its digital plant moisture sensor it continuously monitors soil conditions, testing the moisture level once per second. The Thirsty Light has 5 levels of sensitivity and makes the LED blink faster as the soil gets drier.

With the Thirsty Light, you'll never have to guess when your plants need watering and you won't forget to water your plants because the blinking light will remind you.

The most convenient way to use the Thirsty Light is to leave it in a plant's soil and let it continuously monitor soil conditions. Place one in each plant so you can easily tell which plants need watering.

## Product Characteristics

- Easy to use moisture meter for potted plants
- US product extensively tested in Europe
- Accurate measuring results
- Rugged and durable design
- Uses professional EC technology (Electrical Conductivity)
- Tells you when to water your potted plant

## Technical Specifications

Power	• 2 batteries LR44 included
Product size	• 165mm (l) x 23mm (w) x 18mm (h)
Product weight	• 15 grams (incl. batteries)
Technology	• EC (Electrical Conductivity)
HS-Code / Taric-Code	• 9027801100
Certification	• RoHS and CE approved
Indicator	• flashing LED
Material	• housing: ABS • measuring probe: Brass

## Ordering information

Packaging type	• 48 Blisters per outer carton
Blister size	• 24cm(l) x 8cm(w) x 2.5cm(h)
Outer carton size	• 36cm(l) x 26cm(w) x 28cm(h)
Outer carton weight	• 2,6kg
